

Rug Seal

Are your cotton canvas rugs looking tired and jaded?

Equinade has an easy and economic solution to add new life to your rugs and canvas goods.

Equinade Rug Seal is an excellent re-proofing formula to restore the water repellent finish to your used cotton canvas and rugs. It can be applied easily with a brush, roller or by spraying and has no fumes.

Directions:

- ✓ Brush or wash item to remove all dirt, allow to dry. Best results when item is in a taut position.
- ✓ SHAKE WELL then apply to both sides, paying attention to seams and stitched areas (underside only for patterned or striped fabric to avoid pattern impairment).
- ✓ Allow to dry completely before use or storage. Drying time approx 48 hour in dry, warm sunny conditions.
- ✓ For mildewed fabric, pre-treat with sodium hypochlorite bleach (diluted 1 part bleach to 3 part water), rinse thoroughly and allow to dry before applying Rug Seal.
- ✓ Rug Seal re-proofs, restores water repellent finish and inhibits mildew growth on used canvas goods.
- ✓ Suitable for all cotton canvas products.
- ✓ One litre covers approx six square meters.

Please note: Equinade Rug Seal may slightly whiten the colour of fabric (particularly dark colours).

Available in 1 lt, 2.5 lt and 20 lt bottles from your local equestrian or produce store along with the complete range of Equinade products.
