

## Hoof Salve

**Equinade Hoof Salve** is an anti-bacterial cream that has been designed to aid various hoof problems. It can also be very beneficial for some skin conditions and abrasions. Anti-bacterial agents combined with natural nourishing oils and waxes, work to protect hooves from bacterial and fungicidal infections and also harsh environmental conditions. Regular use of **Hoof Salve** can help prevent problems from developing, especially when your horse's hooves are exposed to extreme conditions such as very hot, dry or wet weather.

The benefits of using **Hoof Salve** are that it:

- ✓ aids bacterial and fungal infections of the hoof and skin, such as greasy heel, mud fever and thrush
- ✓ helps to heal sand cracks, splits and hoof brittleness
- ✓ helps to heal some skin irritations, such as rain scald, girth rash, small cuts and abrasions
- ✓ can reduce the amount of time needed to recover from prolonged ailments
- ✓ contains natural ingredients
- ✓ does not contain camphor (therefore won't swab positive for racing horses)
- ✓ is Australian made with Australian ingredients

Hoof Salve is available in 450g and 850g screw top jars. The Equinade Hoof Care range also includes other natural healing products including: **Hoof Grease, Hoof-Lube and Hoof-Lube Black.**
